Forecast for Wednesday 30 Aug 2023

Weather: Any early fog patches soon clearing to leave a day of broken cloud and sunny intervals. A few showers are possible, these most likely during the morning, then turning mostly dry through the afternoon. Plenty of sunshine by early evening before cloud thickens by dusk.

Chance of cloud-free hill tops above 600m: 60% becoming 90%.

Low cloud and visibility: Patches above 600-700m at first, generally clearing through the morning. The odd patch may drift over the highest summits associated with the showers but otherwise clouds above the summits through the remainder of the day. Generally very good visibilities and excellent air clarity, although locally poor or very poor in early fog patches and low cloud and brief deteriorations in morning showers.

Meteorologist's View

The showers may be drizzly in nature during the morning but aren't expected to be particularly heavy. The best of the afternoon sunshine will be in the east, towards the Black Mountains.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
14:00 on Mon 28 Aug 2023	0.8mm	1.8mm	8.8mm

Forecast for Thursday 31 Aug 2023

Weather: Thickening cloud during the early hours with rain, often heavy, spreading from the southwest. A showery morning is likely with the possibility of more persistent rain for a time. Further showers are possible through the afternoon but an increasing chance of some brighter spells developing. Feeling warm and humid, particularly in any afternoon brightness.

Maximum wind: South to south-easterly 20-25 mph easing to south-westerly 15-20 mph.

Chance of cloud-free hill tops above 600m: 30%, becoming 60% from mid-afternoon.

Low cloud and visibility: Periods of cloud above 300-500m through the morning, perhaps becoming patchier later in the day and confined to ground above 600m. Often poor visibilities in rain and very poor in cloud and hill fog. Locally good later in the day.

Temperature: **Valleys:** Plus 10 Celsius rising to plus 18 Celsius.
At 600m: Plus 10 Celsius rising to plus 14 Celsius.
Freezing level: Well above the summits.
